# INSTALLATION OF WINDOW KIT (OPTIONAL)

Please note: the complimentary window kit provided is only suitable for sash windows. It will not work for all window types.

## INSTALLATION IN A DOUBLE-HUNG SASH WINDOW

1. Connect the rain guards to the insect guard net.

Insert all three projections on each rain guard into the holes in the insect guard net. Side "A" will now be at the top, as indicated in the diagram.

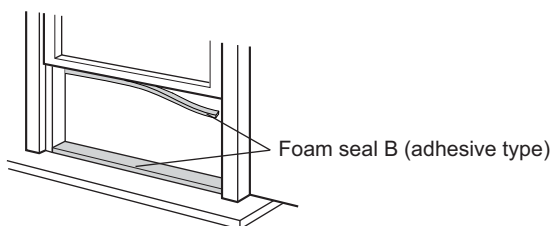

2. Attach the guard combined above to the window panel.

Push the insect guard net firmly to ensure that its four projections fit into the holes in the window panel.
Side "A" will now be at the top, as indicated in the diagram.

3. Cut the Foam seal B (adhesive type) to the proper length and attach it to the window stool and to the bottom of sash.

4. Attach the window panel to the window stool.
   Make sure that the exhaust cover is attached to the window panel. Inner width of the window: 20.5"(520mm)
   Use the window panel.

INSTALLATION OF WINDOW KIT (OPTIONAL)

INSTALLATION IN A DOUBLE-HUNG SASH WINDOW

The window panel cannot be installed in windows less than 20.5" (520mm) wide, as you will not be able to shut the exhaust cover.
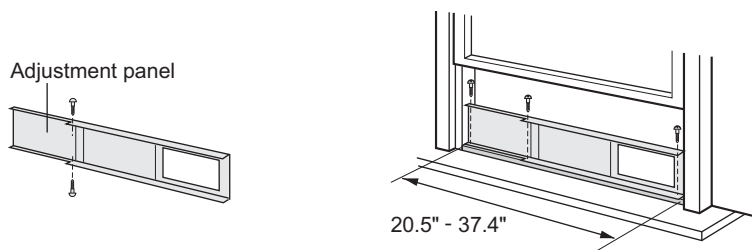

(1) Open the window sash and place the window panel on the window sill.

(2) Secure the window panel to the window stool with screws.

Exhaust cover
Window panel
20.5"

Inner width of the window:20.5" (520mm)- 37.4" (950mm).
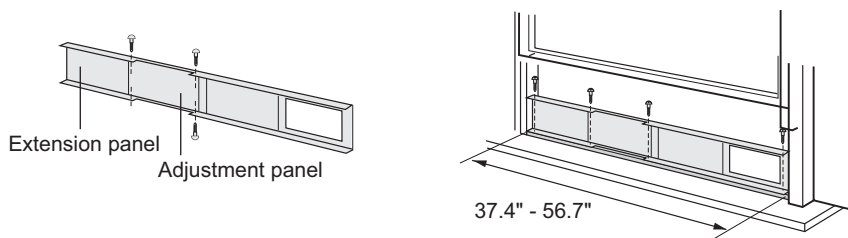

Use the window panel and the adjustment panel.

(1) Open the window sash and place the window panel on the window sill.

(2) Slide the adjustment panel to fit the window frame width.

(3) Secure the window panel to the sill with screws.

Adjustment panel
20.5" - 37.4"

Inner width of the window:37.4" (950mm) - 56.7" (1440mm)

Use the window panel, the adjustment panel and the extension panel.

(1) Open the window sash and place the window panel on the window sill.

(2) Slide the adjustment and extension panels to fit the window frame width.

(3) Secure the window panel to the window sill with screws.

Extension panel
Adjustment panel
37.4" - 56.7"

INSTALLATION OF WINDOW KIT (OPTIONAL)

## INSTALLATION IN A DOUBLE-HUNG SASH WINDOW

5. Close the window sash securely against the window panel.

6. Place the foam seal A between the glass and the window to prevent air and insects from getting into the room.

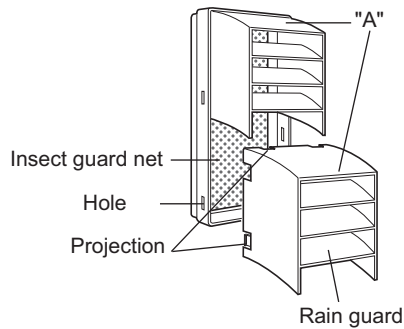

7. Attach the bracket with a screw (recommended).

Please lay a tabular material underneath the window panel if you cannot attach the rain guard or the window adapter due to a deep window sill.
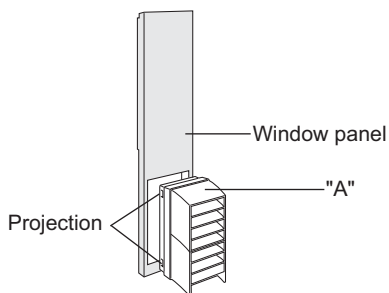

INSTALLATION OF WINDOW KIT (OPTIONAL)

## INSTALLATION IN A SLIDING SASH WINDOW

1. Connect the rain guards to the insect guard net.
Insert all three projections on each rain guard into the holes in the insect guard net.
